

SONANCE

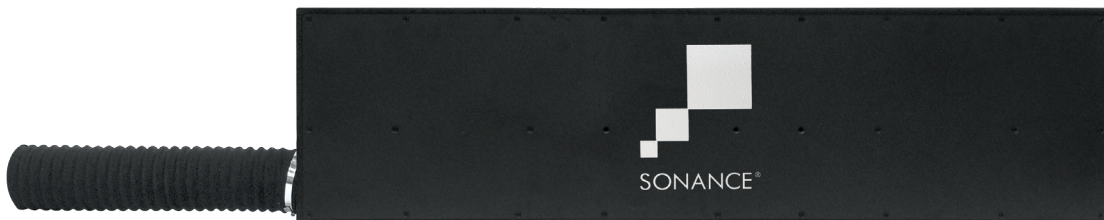

THIN-LINE SUBWOOFER

BPS6 TL

Overview

Sonance is pleased to introduce the new BPS6 Thin-Line bandpass subwoofer designed for challenging install applications. We recognize that many home interiors are faced with space limitations and mounting restrictions within walls and ceilings, leaving clients with limited options

for quality audio. With under 4" of depth and an over 8" equivalent radiating bass driver, the new Sonance BPS6 TL is the perfect solution to add performance audio to any room without disrupting the design of the space.

BPS6 TL

BPS6 TL

Key Features

Aesthetics

- Small grille footprint to match round or square downlights
- Designed to match VP38 and AS38

Performance

- 8" equivalent radiating bass driver
- Passive crossover for versatile wiring options
- Impressive power output (3dB more than BPS6)
- Low distortion

Installation

- Easy installation
- Fits easily into 2 x 4 stud bay with its 3 3/8" mounting depth
- Perfect for challenging mounting applications
- Compatible with both Sonance Architectural Series and Visual Performance Series Band Pass Connectors and grilles
