

# Series Protection™ Compact Surge Device

industry's most compact series type surge protection device

Series Protection™ Compact Surge products offer the fastest-responding technology in the most compact stand alone surge protection device in the industry. Designed to provide protection where space is at a premium, Compact Surge Protection units are ideal for installation behind flat panel displays.

## Features

- Safeguards against both over and under voltage events
- Engineered with non-sacrificial and non-degrading protection that absorbs surges without contaminating ground
- Features automatic recovery – does not require hard reset after a surge event
- Power and protect displays, extenders, digital signage players and more
- Fastest surge response time in the industry
- Ultra compact, 2 outlet design
- Rated at 8 amps
- Designed to mount behind flat panel displays, in furniture, within ceiling and wall boxes, in a rack that's full, or other tight spaces

PD-28-SP

| Part #   | Circuits | Rated Load | Input Type                  | Output Type | Combo Breaker ON/OFF | Outlets |                                      |                                      | Protection        |                                  |                                     |              |

| PD-28-SP | 1        | 8A         | detachable cord (IEC inlet) | NEMA 5-15R  | Yes                  | 2       | 0                                    | 2                                    | Series Protection | supplementary overload protector | Yes                                 | Yes          |

# 2-Stage Compact Surge Device

industry's most compact  
Line-to-Neutral surge protection device

MOV protected Compact Surge products offer the industry's most compact Line-to-Neutral stand alone surge protection device. Designed to provide protection where space is at a premium, Compact Surge Protection units are ideal for installation behind flat panel displays.

## Features

- The most compact Line-to-Neutral surge protection device available that deflects surge events to neutral without contaminating ground
- Safeguards against both over and under voltage events
- Two stage technology for enhanced surge protection
- Power and protect displays, extenders, digital signage players and more
- Designed with quality fire-protected components that eliminate risk of fire associated with a surge event
- Ultra compact, 2 outlet design
- Rated at 15 amps
- Mounts behind flat panel displays, in furniture, within ceiling and wall boxes, in a rack that's full, or other tight spaces
