# Sivoia QS Triathlon WIDR

## Battery-powered roller shades up to 12' x 12'

- With Integrated Deflection Reduction.
- Fascia height is identical to standard Triathlon fascia height for consistency on mixed jobs. Projection is 1 1/8" deeper.
- Features robust Infinity Springs to last the lifetime of the shade.

## Fabric options

We can build Triathlon WIDR shades with a wide variety of roller fabrics from our collection. Fabric orientation is dependent upon the fabric properties and the size requirements of your shade.

Example:

Roll width: 116"  
Railroadable: Yes  
Seamable: Yes

Regular

(Ex: 108" wide x 108" tall shade)

Shades with a width that is smaller than the fabric roll width will be built with the orientation of the fabric as shown on a fabric card or sample.

Railroaded

(Ex: 120" wide x 108" tall shade)

Shades that are wider than the fabric roll width will be built with the fabric railroaded (turned at a 90 degree angle to the orientation shown on the fabric card or sample).

Railroaded with seam

(Ex: 144" wide x 144" tall shade)

Shades that are both wider and taller than the fabric roll width will be built with the fabric railroaded, and an additional panel seamed below it to meet the height requirements.

Trimmed off area for short fold
